Career and Technical Education

At the secondary level, CTE is delivered in both comprehensive high schools and through Secondary Area Career Centers. At the postsecondary level, CTE is delivered through the community college system and three technical institutes, which offer programs that can be completed in as little as 6 to 12 weeks or 1 to 2 years.¹

In FY 2015, 29% of secondary and 47% of postsecondary students enrolled in CTE were economically disadvantaged.²

Career Clusters

Seven of the 16 career clusters in CTE lead to high-skill, high-wage, and high-demand STEM-related careers. These clusters include Agriculture, Architecture, Health, Information Technology, Manufacturing, STEM, and Transportation, Distribution, and Logistics and contain programs that prepare students for nontraditional careers.

Secondary Enrollment, FY 2015³

Postsecondary Enrollment, FY 2015³
Middle-Skill and STEM Jobs

The pipeline to middle-skill and STEM jobs loses young people at every level of the education system. Thus, the supply of sufficiently trained workers will not meet the demand of key industries.

Fast Facts

From 2014 to 2024…

• Computing jobs will grow by 14%.
• Engineering jobs will grow by 11%.
• Advanced manufacturing jobs will grow by 15%.
• Of all job openings, 52% will require training at the middle skill-level.

Yet…

• 24% of students who enter an associate’s degree program graduate.
• 42% of students who enter a bachelor’s degree program graduate.
• 49% of workers are trained to the middle-skill level.

2016 AP Test Taking and Passing

Students pursuing careers in STEM, particularly computer science and engineering, must become academically prepared early in their educational trajectory.

For Arkansas, in 2016, college-bound female students earned an average math SAT score of 546, compared to 598 for male students.
