

California

Education Equity in 2020

Higher Education Act

The Higher Education Act of 1965 authorizes a number of federal aid programs to provide assistance for students in secondary and postsecondary institutions. The Act was comprehensively reauthorized most recently in 2008 and has been reauthorized eight times in total.

Career and Technical Education (CTE) in California

CTE provides secondary and postsecondary students with academic and technical skills and knowledge to prepare for the current and future workforce. To realize our business, economic, and human potential, we must close equity gaps by gender, race and ethnicity, and special population status in high-skill, high-wage, programs of study.

Minority Serving Institutions

Almost **700 institutions** across the United States are Minority Serving Institutions (MSIs) and produced **28% of graduates** in 2017. MSIs admit a larger proportion of minority and low-income students than non-MSIs. They propel their students from the bottom to the top of the income distribution at higher rates than do non-MSIs, showing that MSIs are a viable path to climb the economic ladder.

2019 MSI Breakdown, public 2-year, public 4-year, private 4-year

California United States

0	24	Alaska Native and Native Hawaiian Serving Institutions (ANNH)
57	125	Asian American and Native American Pacific Island Serving Institutions (AANAPISI)
140	386	Hispanic Serving Institutions (HSI)
0	92	Historically Black Colleges and Universities (HBCU)
0	27	Native American Indian Serving, Non-Tribal Institutions (NASNTI)
0	101	Predominantly Black Institutions (PBI)
0	33	Tribal Colleges and Universities (TCU)

Adult Learners

An individual employer, group of employers, labor organization, education institution, or an industry association can sponsor an apprenticeship program. These programs provide hands-on learning and technical instruction for apprentices, often adults seeking to upskill or re-skill into a different industry.

Workforce Innovation & Opportunity Act (WIOA)

WIOA is landmark legislation that took effect on July 1, 2015, and is designed to strengthen and improve our nation's public workforce system and help place Americans, including youth and those with significant barriers to employment, into high-quality jobs and careers.

Artificial Intelligence and the Workforce

The likeliness of workforce exposure to AI depends on gender, age, race and ethnicity. AI could affect work in virtually every occupational group. AI exposure is calculated by quantifying the overlap between the text of AI patents and the text of job descriptions, identifying occupations likely to be affected by AI specifically, as opposed to those affected more broadly by other automation technologies.

Average standardized AI exposure by state, 2017

California
