

BUILDING A NATIONAL ALLIANCE TO BROADEN PARTICIPATION IN STEM AND CTE

NSF INCLUDES Alliance Proposal

NAPE

National Alliance for
Partnerships in Equity

NSF INCLUDES

NSF INCLUDES Five Elements of Collaborative Infrastructure

Vision

- Engage the community in a shared vision;

Partnerships

- Provide a platform for collaborative action;

Goals and metrics

- Allow for evidence-based decision making;

Leadership and communication

- Increase communication and visibility;

Potential for expansion, impact, and scale

- Establish the capacity for expansion, sustainability, and scale.

Critical Functions of NSF INCLUDES Alliances

- Develop vision and strategy with relevant metrics of success and key milestones/goals
- Contribute to the knowledge base on broadening participation in STEM
- Develop multi-stakeholder partnerships
- Establish a “backbone” or support organization
- Advance a logic model that identifies outcomes

Vision

- Create a cross-state alliance of formal education system partners that are committed to systems change that creates a culture of success for every student in STEM and CTE, ultimately leading to a more diverse STEM workforce.

Mission/Common Agenda

- Broaden participation and close achievement gaps in 7-12 and undergraduate STEM education and CTE, by scaling effective practices that close these gaps at the critical junctures that currently limit participation of underrepresented students in STEM career pathways.
